

## 8 Benefits of Washington State Sewer and Water Districts

There are 182 Sewer and Water Districts throughout the State of Washington, each governed by locally elected officials.

These districts provide cost-effective sewer and water services—ranging from the state's largest population centers, to the smallest rural communities.

The Washington Association of Sewer & Water Districts retained Eastern Washington University's Institute for Public Policy and Economic Analysis to conduct a study measuring the impacts of these locally governed districts.

The top eight benefits are at right; a sample of county-specific benefits are provided on the back.

**1 Nearly a Quarter of State Water Service**  
Special Purpose Water Districts provide clean, affordable water to 19% of the state's population (22% on a public water system).

**2 One Fifth of State Sewer Service**  
Special Purpose Sewer Districts provide environmentally cost-effective sewer transmission and/or treatment to 14% of the state's population (21% connected to sewer system and treatment plant).

**3 \$595 Million Service With No Property Tax**  
State Sewer and Water Districts collectively operate a \$595 million dollar annual enterprise without imposing any property taxes.

**4 \$135 Million Invested in Infrastructure**  
State Sewer and Water Districts collectively invest over \$135 million annually on capital improvement projects that ensure reliable service.

**5 \$55 Million Contracted With Small Business**  
State Sewer and Water Districts throughout the state spend \$55 million annually contracting with small business.

**6 \$17 Million in Support of State Investments**  
State Sewer and Water Districts help support critical state investments by paying \$17 million annually in B&O and Utility Excise taxes.

**7 \$5 Million in Support of Local Governments**  
State Sewer and Water Districts help local governments collect utility taxes to fund local governmental services—currently in excess of \$5 million annually.

**8 Gainful Employment**  
State Sewer and Water Districts directly support 1,345 jobs with an average annual salary of \$68,500.

## Examples of Special Purpose District Benefits by County

Special Purpose Sewer and/or Water Districts operate in 34 of Washington's 39 Counties. Below is a sampling of benefits that Special Purpose Districts provide on a county-wide basis.

Visit our interactive online map at [www.waswdmap.org](http://www.waswdmap.org)

### **A** King County

#### Special Purpose Water & Sewer Districts

- 31% of the county's population served by a Special Purpose Water District; 28% by a Special Purpose Sewer District
- \$65 million in water and sewer infrastructure projects currently underway
- \$22 million in contracts with small businesses
- \$9.4 million remitted in annual state taxes
